

GEO DRILLING MACHINERY

*From application
To production*

DRILL RIGS

GEO 500 Drill Rig 1 - 3
GEO 900 Drill Rig 4 - 6
GEO 900-E Drill Rig 7 - 9
GEO 1500 Drill Rig 10 - 12
GEO 2000 Drill Rig 13 - 15

WIRELINE CORING SYSTEM

NWL Core Barrel 16
NWL Inner Tube Head Assembly 17
NWL Overshot Assembly 18
NW Casing / HWL Rod Cutter Assembly 19
HWL Core Barrel 20
HWL Inner Tube Head Assembly 21
HWL Overshot Assembly 22
HW Casing / HWL Rod Cutter Assembly 23
PWL Core Barrel 24
PWL Inner Tube Head Assembly 25
PWL Overshot Assembly 26
PW Casing / SWL Rod Cutter Assembly 27
Fishing Taps & Adapter Subs 28

DRILL ROD & CASING 29 - 30

DRILL BITS & REAMING SHELL

Drill Bits 31
Reaming Shell 32
Diamond Products 33 - 35

About Us

GEO Drilling Machinery Ltd. was established in 2010 with the aim of addressing the current demands and requirements of the drilling industry in a more economical way. Our approach involves offering innovative products and assisting customers to drill more meters in a highly productive manner. GEO Drilling Machinery Ltd. aims to boost its manufacturing capacity by harnessing the collective experience of our partner drilling company, Ortadoğu Drilling Inc., which utilizes our safety-regulated drilling equipment and rigs in its deep core drilling projects.

After our company was founded, we conducted studies and began manufacturing drilling machines such as the GEO 500, GEO 900, GEO 900-E, GEO 1500 and GEO 2000, drilling equipment as well as water pumps. As GEO Sondaj Makine, we design these drilling rigs according to customer demands and with innovative features. In order to support our design and innovation efforts, we participated in the support programs sponsored by The Technology and Innovative Support Programs Department of The National Research Council of Turkey (TUBITAK).

At GEO Drilling Machinery Ltd., we are dedicated to continuous product development. We consider feedback from our clients, the expertise of our Research & Development team, as well as suggestions and feedback from our team members as integral to this ongoing process. We don't limit these suggestions to just our products, but also incorporate them into our services and business processes and we continuously strive to improve our quality promise.

GEO 500 Drill Rig

Depth Capacities (Vertical Borehole)

	Dry Hole (m)*	Wet Hole (m)*
PWL	450	500
HWL	700	770
NWL	1.050	1.155

(*) Depth capacity is given according to drill rig feed cylinder pull capacity. Depth capacity might be increased while using the rods which have light weight V-wall or different thread design. Depth based on vertical hole.

Power Unit (80 cc)

	Option 1	Option 2
MFG	Iveco (@2200 RPM)	Cummins (@2200 RPM)
Model	N67MNTX20.00 A800	6BTA5.9-CI80-II
Power	129 kW (175 HP)	132 kW (180 HP)
Type	Turbo & intercooler	Turbo & intercooler
Cooling	Water	Water

Our standard production includes Iveco and Cummins engines. Upon request from different manufacturers such as Volvo, Ford, and Deutz the delivery date may vary based on the engine delivery date.

Torque & RPM Rating

Gear Ratio	Speed (RPM)	Torque (Nm)
1. 6,27:1	122 - 199	3.950 - 2.250
2. 3,12:1	246 - 400	1.650 - 1.420
3. 1,75:1	439 - 714	1.420 - 705
4. 1,00:1	714 - 1.250	705 - 341

Rotation Lubrication Unit

Hydraulically driven cooled oil circulation, with 25 micron suction filter.

Chuck Assembly

Type	7 jaws - Hydraulic open, spring closed
Max. Inside Diameter	120 mm (P wireline size)
Holding Capacity	19.000 kg

Hydraulic System (@1.600 RPM)

	Max. Flow Rate	Max. Pressure
Primary Pump	128 L/min	300 Bar
(Main hoist, Wireline hoist, Rotation, Fast feed pull/push cylinder and Crawler tracks)		
Secondary Pump	72 L/min	230 Bar
(Water/mud pump)		
Auxiliary Pump	72 L/min	180 Bar
(Fine feed drilling, Foot clamp, Chuck, Rod slide, Rotation head slide, Rotation pilot, Main hoist pilot, Rotation lubrication, Mast raising/lowering, Mast dump/retraction, Mast telescope, Leveling jacks (4))		
Mixer Gear Pump	32 L/min	60 Bar
(Hydraulic oil and rotation unit box oil cooling)		

Hydraulic Oil Cooling

Hydraulic and rotation unit box oil are cooling by air.

Mast & Feed System

Drilling Angle	Vertical to 90 degree
Sliding Distance	2,20 m (According to mast axis)
Feed Travel	3,40 m
Telescopic Mast	3,30 m (Open and close by hydraulic feed cylinder)
Feed Speeds	Fast and slow with variable controls
Maximum Pull	15.000 kg
Maximum Push	12.500 kg

Standard 6 m pull, angle hole, telescopic mast for ease of set up, ST 52-3 steel profile.

Rod Holder

There is a rod holder on top of the rotation unit. The rod holder keeps the rod steady, allowing it to be opened using a hydraulic chuck. By moving up and down with a spring system, the rod holder prevents damage to the threads of the rods. The rod holder prevents friction of the rod during advancement by moving forward and backward. P, H and N wireline jaws are using.

Main Line Hoist

Capacity 9.000 kg (Single line)

Cable Size 21,5 m x 16 mm rope

Line Speed Bare Drum 35 m/min

Hydraulic driven planetary hoist.

Wireline Hoist

Hydraulically driven with integral counter balance valves.

Capacity 2.000 m x 4,6 mm rope

	Line Pull (kg)	Line Speed (m/min)
Bare Drum	1.870	138
Full Drum	545	474

Rod Clamp

Hydraulically powered N, H, P and S wireline rod jaw sizes.

Capacity 25.000 kg

Water Pump

Hydraulically driven 835 water/mud pump.

Max. Flow Rate 35 gpm @ 800 psi

Mud Mixer (With Mud Mixing Tank)

Hydraulically driven mud mixer.

Max. Speed 2.300 rpm

Drill Base Support

Supports 4 Hydraulic leveling jacks.

Travel Length 500 mm

Crawler Mounted

Max. Velocity 4,2 km/h

Max. Slope 30 Degree

Lighting System

There are 4 LED lighting lamp on the mast.

Mast Ladder

3 parts of ladder.

Weight

Crawler Mounted Weight 8.900 kg

Hydraulic Hose & Connections

Parker connection and hydraulic hoses German brand or Cast connection and hydraulic hoses Italian brand.

Proportional Valves

Controls: Main winch, Wireline winch, Rotation, Fast feed pull/push cylinder and Crawler

Manifold Valve Bank

Controls: Fine feed drilling, Foot clamp, Chuck, Rod slide, Rotation head slide, Head opener, Rotation pilot, Main hoist pilot, Rotation lubrication control valves.

Auxiliary Valve Bank

Controls: Mast raising/lowering, Mast dump/retraction, Levelling jacks (4)

Control Panel

Emergency stop, Drill head rotation pressure, Feed monometer, Hold back manometer, Main hoist monometer, First pump monometer, Secondary pump monometer, Auxiliary pump monometer, Drill head rotation lubrication monometer.

Engine pressure, Engine temperature, Engine RPM, Engine working hour; Engine trouble information, Drill head lubrication trouble information, Rotation RPM meter.

Warranty

1 year against faulty workmanship individual manufactures warranty on all components as per our terms and condition of sale.

These technical specifications are based on theoretical engineering calculations. Actual capacity will depend on specific drilling conditions and materials. Geo Sondaj Makine İmalat Ltd. reserves the right to change or make modifications to designs and specifications without prior notice or obligation.

Options

Mast lighting and installation, Water pump release valve, manometer, accumulator and diaphragm, Rod holder, Rod spinner, Rod loader, Swiveling control panel, Remote control panel, Mast ladder, Enclose operator cabin, Engine service information connection, Warning horn to alert drill crew, Fire suppression unit, Water flow meter, Hydraulic oil reservoir fill pump, Wireline hoist self levelling system, SPT

Dimensions

a : 7.200 mm
b : 2.500 mm
c : 2.230 mm

All weights and dimensions are approximations and are subject to change.

CE certificated.

GEO 900 Drill Rig

Depth Capacities (Vertical Borehole)

	Dry Hole (m)*	Wet Hole (m)*
PWL	1.000	1.100
HWL	1.500	1.650
NWL	2.200	2.400

(*) Depth capacity is given according to drill rig feed cylinder pull capacity. Depth capacity might be increased while using the rods which have light weight V-wall or different thread design. Depth based on vertical hole.

Power Unit (107 cc)

	Option 1	Option 2
MFG	Cummins (@2200 RPM)	Ford (@2000 RPM)
Model	6CTA 8.3 – C260II	9E33
Power	194 kW (260 HP)	243 kW (330 HP)
Type	Diesel turbo charged / After cooled.	
Cooling	Water	Water

Our standard production includes Ford and Cummins engines. Upon request from different manufacturers such as Volvo, Deutz, and Iveco the delivery date may vary based on the engine delivery date.

Torque & RPM Rating

Gear Ratio	Speed (RPM)	Torque (Nm)
1. 6,27:1	122 - 199	5.322 - 3.254
2. 3,12:1	246 - 400	2.648 - 1.620
3. 1,75:1	439 - 714	1.620 - 908
4. 1,00:1	714 - 1.250	849 - 519

Rotation Lubrication Unit

Hydraulically driven cooled oil circulation, with 25 micron suction filter.

Chuck Assembly

Type	7 jaws - Hydraulic open, spring closed
Max. Inside Diameter	120 mm (P wireline size)
Holding Capacity	19.000 kg

Hydraulic System (@1.600 RPM)

	Max. Flow Rate	Max. Pressure
Primary Pump	179 L/min	300 Bar
(Main hoist, Wireline hoist, Rotation, Fast feed pull/push cylinder and Crawler tracks)		
Secondary Pump	72 L/min	230 Bar
(Water/mud pump)		
Auxiliary Pump	72 L/min	180 Bar
(Fine feed drilling, Foot clamp, Chuck, Rod slide, Rotation head slide, Rotation pilot, Main hoist pilot, Rotation lubrication, Mast raising/lowering, Mast dump/retraction, Mast telescope, Leveling jacks (4))		
Mixer Gear Pump	32 L/min	60 Bar
(Hydraulic oil and rotation unit box oil cooling)		

Hydraulic Oil Cooling

Hydraulic and rotation unit box oil are cooling by air.

Mast & Feed System

Drilling Angle	45 - 90 degree
Sliding Distance	2,20 m (According to mast axis)
Feed Travel	3,40 m
Telescopic Mast	3,30 m (Open and close by hydraulic feed cylinder)
Feed Speeds	Fast and slow with variable controls
Maximum Pull	16.000 kg
Maximum Push	12.500 kg

Standard 6 m pull, angle hole, telescopic mast for ease of set up, ST 52-3 steel profile.

Rod Holder

There is a rod holder on top of the rotation unit. The rod holder keeps the rod steady, allowing it to be opened using a hydraulic chuck. By moving up and down with a spring system, the rod holder prevents damage to the threads of the rods. The rod holder prevents friction of the rod during advancement by moving forward and backward. P, H and N wireline jaws are using.

Main Line Hoist

Capacity 18.000 kg (Single line)

Cable Size 21,5 m x 18,5 mm rope

Line Speed Bare Drum 35 m/min

Hydraulic driven planetary hoist.

Wireline Hoist

Hydraulically driven with integral counter balance valves.

Capacity 2.000 m x 4,6 mm rope

	Line Pull (kg)	Line Speed (m/min)
Bare Drum	1.870	138
Full Drum	545	474

Rod Clamp

Hydraulically powered N, H, P and S wireline rod jaw sizes.

Capacity 25.000 kg

Water Pump

Hydraulically driven 835 water/mud pump.

Max. Flow Rate 35 gpm @ 800 psi

Mud Mixer (With Mud Mixing Tank)

Hydraulically driven mud mixer.

Max. Speed 2.300 rpm

Drill Base Support

Supports 4 Hydraulic leveling jacks.

Travel Length 500 mm

Crawler Mounted

Max. Velocity 4,2 km/h

Max. Slope 30 Degree

Lighting System

There are 4 LED lighting lamp on the mast.

Mast Ladder

3 parts of ladder.

Weight

Crawler Mounted Weight 11.500 kg

Hydraulic Hose & Connections

Parker connection and hydraulic hoses German brand or Cast connection and hydraulic hoses Italian brand.

Proportional Valves

Controls: Main winch, Wireline winch, Rotation, Fast feed pull/push cylinder and Crawler

Manifold Valve Bank

Controls: Fine feed drilling, Foot clamp, Chuck, Rod slide, Rotation head slide, Head opener, Rotation pilot, Main hoist pilot, Rotation lubrication control valves.

Auxiliary Valve Bank

Controls: Mast raising/lowering, Mast dump/retraction, Levelling jacks (4)

Control Panel

Emergency stop, Drill head rotation pressure, Feed monometer, Hold back monometer, Main hoist monometer, First pump monometer, Secondary pump monometer, Auxiliary pump monometer, Drill head rotation lubrication monometer.

Engine pressure, Engine temperature, Engine RPM, Engine working hour, Engine trouble information, Drill head lubrication trouble information, Rotation RPM meter.

Warranty

1 year against faulty workmanship individual manufactures warranty on all components as per our terms and condition of sale.

These technical specifications are based on theoretical engineering calculations. Actual capacity will depend on specific drilling conditions and materials. Geo Sondaj Makine İmalat Ltd. reserves the right to change or make modifications to designs and specifications without prior notice or obligation.

Options

Hydraulic welder and generator package, Hydro pump, Cyclone, Mast lighting and installation, Water pump release valve, monometer, accumulator and diaphragm, Rod spinner, Rod holder, Rod loader, Swiveling control panel, Remote control panel, Mast ladder, Enclose operator cabin, Engine service information connection, Warning horn to alert drill crew, Fire suppression unit, Water flow meter, Hydraulic oil reservoir fill pump, Wireline hoist self levelling system

Dimensions

a : 7.200 mm
b : 2.570 mm
c : 2.230 mm

All weights and dimensions are approximations and are subject to change.

CE certificated.

GEO 900 - E Drill Rig

Depth Capacities (Vertical Borehole)

	Dry Hole (m)*	Wet Hole (m)*
PWL	1.000	1.100
HWL	1.500	1.650
NWL	2.200	2.400
BWL	3.000	3.300

(*) Depth capacity is given according to drill rig feed cylinder pull capacity. Depth capacity might be increased while using the rods which have light weight V-wall or different thread design. Depth based on vertical hole.

Power Unit (107 cc)

Power	110 kW (148 HP) (@1500 RPM)
Engine Type	Electric Engine

EMTAS, Siemens or ABB electric engines are using our production.

Rotation Lubrication Unit

Hydraulically driven cooled oil circulation, with 25 micron suction filter.

Chuck Assembly

Type	7 jaws - Hydraulic open, spring closed
Max. Inside Diameter	120 mm (P wireline size)
Holding Capacity	19.000 kg

Hydraulic System (@1.450 RPM)

	Max. Flow Rate	Max. Pressure
Primary Pump	140 L/min	300 Bar
(Main hoist, Wireline hoist, Rotation, Fast feed pull/ push cylinder and Crawler tracks)		
Secondary Pump	62 L/min	220 Bar

Hydraulic Oil Cooling

Hydraulic and rotation unit box oil are cooling by air.

Mast & Feed System

Drilling Angle	Vertical to horizontal
Sliding Distance	1,00 m (According to mast axis)
Feed Travel	1,80 m
Telescopic Mast	1,50 m (Open and close by hydraulic feed cylinder)
Feed Speeds	Fast and slow with variable controls
Maximum Pull	16.000 kg
Maximum Push	12.750 kg

Standard 1,5 m pull, angle hole, telescopic mast for ease of set up, ST 52-3 steel profile.

Rod Holder

There is a rod holder on top of the rotation unit. The rod holder keeps the rod steady, allowing it to be opened using a hydraulic chuck. By moving up and down with a spring system, the rod holder prevents damage to the threads of the rods. The rod holder prevents friction of the rod during advancement by moving forward and backward. P, H and N wireline jaws are using.

Main Line Hoist

Capacity 9.000 kg (Single line)

Cable Size 16 m x 16 mm rope

Line Speed Bare Drum 35 m/min

Hydraulic driven planetary hoist.

Wireline Hoist

Hydraulically driven with integral counter balance valves.

Capacity 1.500 m x 4,6 mm rope

	Line Pull (kg)	Line Speed (m/min)
Bare Drum	1.870	138
Full Drum	545	474

Rod Clamp

Hydraulically powered N, H, P and S wireline rod jaw sizes.

Capacity 20.000 kg

Water Pump

Hydraulically driven 835 water/mud pump.

Max. Flow Rate 35 gpm @ 800 psi

Drill Base Support

Supports 4 Hydraulic leveling jacks.

Travel Length 500 mm

Crawler Mounted

Max. Velocity 4,2 km/h

Max. Slope 30 Degree

Lighting System

There are 4 LED lighting lamp on the mast.

Mast Ladder

3 parts of ladder.

Weight

Crawler Mounted Weight 10.000 kg

Hydraulic Hose & Connections

Parker connection and hydraulic hoses German brand or Cast connection and hydraulic hoses Italian brand.

Control Panel

Emergency stop, Drill head rotation pressure, Feed monometer, Hold back monometer, Main hoist monometer, First pump monometer, Secondary pump monometer, Drill head rotation lubrication monometer.

Engine pressure, Engine temperature, Engine RPM, Engine working hour, Engine trouble information, Drill head lubrication trouble information, Rotation RPM meter.

Warranty

1 year against faulty workmanship individual manufactures warranty on all components as per our terms and condition of sale.

Controls: Fine feed drilling, Foot clamp, Chuck, Rod slide, Rotation head slide, Head opener, Rotation pilot, Main hoist pilot, Rotation lubrication control valves.

Auxiliary Valve Bank

Controls: Mast raising/lowering, Mast dump/retraction, Levelling jacks (4)

Swivelling Panel

Emergency stop, Drill head rotation pressure, Feed monometer, Hold back monometer, Main hoist monometer, First pump monometer, Secondary pump monometer, Auxiliary pump monometer, Drill head rotation lubrication monometer.

Engine pressure, Engine temperature, Engine RPM, Engine working hour; Engine trouble information, Drill head lubrication trouble information, Rotation RPM meter.

Warranty

1 year against faulty workmanship individual manufactures warranty on all components as per our terms and condition of sale.

These technical specifications are based on theoretical engineering calculations. Actual capacity will depend on specific drilling conditions and materials. Geo Sondaj Makine İmalat Ltd. reserves the right to change or make modifications to designs and specifications without prior notice or obligation.

Options

Hydraulic welder and generator package, Hydro pump, Cyclone, Mast lighting and installation, Water pump release valve, monometer, accumulator and diaphragm, Rod spinner, Rod holder, Rod loader, Swiveling control panel, Remote control panel, Mast ladder, Enclose operator cabin, Engine service information connection, Warning horn to alert drill crew, Fire suppression unit, Water flow meter, Hydraulic oil reservoir fill pump, Wireline hoist self levelling system

Dimensions

a : 7.400 mm
b : 2.500 mm
c : 2.230 mm

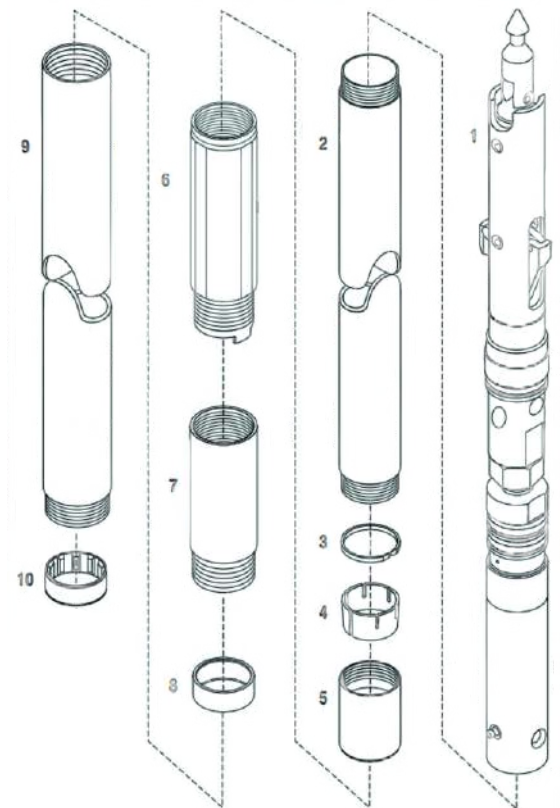

All weights and dimensions are approximations and are subject to change.

CE certificated.

Wireline Coring System

Drill Rod & Casing

GEO DRILLING MACHINERY LTD. rods are produced using cold drawn steel tubes, grades of them is ASTM A510 4130 standart. Drill rods are 20 cm quench and temper heat treatment of box and pin ends for increased tensile and yield strength.

GEO DRILLING MACHINERY LTD. produce 4 types of thread profiled as WL-Q, WL-HD, WL-R and WL-X. For easily identification grooves are open on the pin end of drill rods according to profile types.

WL-Q THREAD PROFILE

WL-R THREAD PROFILE

WL-HD THREAD PROFILE

WL-X THREAD PROFILE

Normal Wear Patterns

New Condition

Ideal New Pattern

The face wear pattern of an impregnated bit should be relatively flat with slightly chamfered sides. Bit feels sharp, comet tails have formed to support diamonds. Diamonds release from matrix as they are worn. Gauge stays within tolerance.

Normal Retirement

Full depth of impregnation evenly consumed. Gauge stays within tolerance.

Irregular Wear Patterns

Concave Face Wear

(Rounded to Inner Diameter)
Cause: Often caused by excessive penetration rate for the RPM used. This can also be caused by core grinding, overdrilling.
Solution: Reduce penetration rate or increase RPM.

Concave Face Wear

(Rounded to Outer Diameter)
Cause: Insufficient water flow.
Solution: Check pump and rod string for leaks; increase pump output.

Gauge Loss ID

Cause:
(A) Overfeeding
(B) Broken formations
(C) Drilling over lost core
(D) Insufficient drilling fluid
Solution:
(A) Reduce penetration rate
(B) Cement or change to a lower series bit
(C) Check core barrel/core lifter/core lifter case
(D) Check inner tube length adjustment; check pump and rod string for leaks

Gauge Loss Outer Diameter

Cause:

- (A) Lack of circulation
- (B) Bit being reamed down under-size hole
- (C) Vibration

Solution:

- (A) Increase coolant flow rate
- (B) Check reamer shell gauge and replace if under-sized
- (C) After RPM

Excessive Diamond Exposure

Matrix abraded away before diamonds have worn sufficiently, resulting in high diamond exposure and low bit life.

Cause: Caused by overfeeding/overdrilling

Solution: Increase RPM, change to a lower series bit, or reduce bit weight.

Face Glazed

Bit does not feel sharp; diamonds flush w matrix; no significant "comet tails" behind each diamond. Snad blast face or use other recommended methods to re-expose diamond. If the face glazes repeatedly, change to a higher bit.

Cracked Waterways

Cause:

- (A) Excessive bit load; dropped rods; free fall of (wireline) inner tube in dry hole
- (B) Bit crushed by rod holder, foot clamp or pipe wrench
- (C) Pushed down an undersized hole (i.e., reaming shell worn out).

Solution: Review proper operating procedures.

Burnt

Cause:

- (A) Lack of fluid.
- (B) Too high of weight on bit being used

Solution: Check pump and rod string for leaks, check inner tube adjustment, maintain coolant flow rates.

A large area of the page is filled with a grid of small, light gray dots, intended for students to write their notes.
